Class conditions. Please read carefully

- **Nature** (NB: definition revised 2020):  
(PAGB Nature Photography Definition, **May 2020** – See [http://www.thepagb.org.uk/wp-content/uploads/nature\\_eligibility.pdf](http://www.thepagb.org.uk/wp-content/uploads/nature_eligibility.pdf) )

Nature means Images where living organisms are the primary subject matter. The story telling value of an Image will normally be weighed more than the pictorial quality.

Nature includes:

- > Images taken with subjects in controlled conditions such as zoos, game parks, botanic gardens, aquariums and enclosures where the subjects are dependent on man for food. Scientific bands, tags or collars are permissible.

Nature excludes:

- > Images where the subjects are obviously domestic animals or plants.
- > Images where an obviously artistic treatment has been applied.

Processing of the captured image, by cropping, exposure adjustment, colour correction, noise minimisation, dodging/burning, HDR, focus stacking and sharpening, is permitted, as is cloning of image defects and minor distractions including overlapping elements.

An Image appearing to meet these criteria will be accepted as Nature. The Judges will normally assume that any Image presented to them is eligible.

Access to some biological subjects may be restricted. Where that is relevant, then Photographers warrant that they have followed relevant codes of practices and hold any necessary licences.

Guidance Notes:

Note that images already meeting the separate FIAP Definition of Nature will satisfy this less restrictive definition.

Artistic Nature, meaning photographs which started as Nature, but which have been creatively modified to show a purely pictorial image, do not meet the Nature definition. They should be entered in one of the other Classes as appropriate, and do not count towards any Nature quota restriction.

It is not feasible to investigate adherence to the Nature definition when receiving multiple entries at an Event. Entrants should therefore expect the Organiser to consider that if an image looks like a Nature image, then it will be treated as a Nature image, even if the entrant suggests excessive manipulation. Entrants should plan their entries accordingly.

It is not desirable to have an Image excluded at short notice, before or after judging, when there is no facility for discussion. In a Nature Event or Category, the Selectors should assume that any Image presented to them does meet the PAGB Nature definition.

After judging, the Organisers have discretion to review eligibility, including calling for the original file of the image, and this is likely for any awards.

- **Creative** (NB: definition revised 2020):

Our definition of 'Creative' is '*Altered Reality*'.

If a camera could not have captured the scene presented (e.g. because the scene never existed' as in most montages), then it will be considered to be 'Altered Reality'. 'Creative' images are often montages (a blending or composite of multiple non-similar images). Any image composed from foreground (subject) image(s) and one or more different background elements should be considered to be 'Altered Reality' and therefore 'Creative'. A 'Creative' image could also display a significant change in natural colour, form, shape, or any combination of these three from the original major photographic image.

The major element(s) that make up the image must have been captured using the photographic process and the image's photographic core content must still be identifiable. Minor elements of artwork or computer graphics, generated by the entrant, may be incorporated provided that the original photographic content predominates. 'Creative' images may not incorporate elements produced by anyone else.

In camera techniques that blend non-similar images through for example multiple different exposures are to be considered 'Creative'.

The following are not considered to be 'Creative'; these should be entered into one of the other appropriate Classes:

- High Dynamic Range (HDR) images without further 'creative' changes.
- Intentional Camera Movement (ICM) or long exposure techniques without further 'creative' changes.
- Bracketing, focus stacking or other forms of blending elements of clearly similar images (e.g. those from a series), where the camera could still have captured the scene presented.

Any subject matter is acceptable as long as the 'Altered Reality' and Creative guidelines are followed.

Non-creative images are not eligible for this Class.

Images entered in this Class may be colour or monochrome.

- **Scapes:**

This Class encompasses Landscapes, Seascapes, Waterscapes, Skyscapes, and/or Cityscapes or any scenic view where the main subject matter is the view. People, buildings or other objects may be included in the scene as long as they are ancillary and or supportive of the main subject and are not the main subject of the image.

Images entered in the Scapes Class may be colour or monochrome, including Infra-red and or HDR images.

- **Monochrome:**

A black and white image going from very dark grey (black) to very clear grey (white) and containing only various shades of grey.

A 'black and white' work toned entirely in a single colour remains eligible for the Monochrome Class. However, a 'black and white' work modified by partial toning or by the addition of one or more colours (e.g. a colour splash), becomes a colour work and is thus ineligible for the Monochrome Class.

Only monochrome images which do not fit into the 'Creative' or 'Colour' Classes should be entered into the Monochrome Class. 'Altered Reality' images are considered 'Creative' (please see the Creative definition).

Images clearly fitting the 'Scapes' definition should normally be entered into the 'Scapes' Class, where they may be considered more favourably.

Nature images should normally be entered into the 'Nature' Class. If a nature image is entered in the 'Monochrome' Class, it will be assumed to fall outside the definition of the 'Nature' Class, such as because of 'artistic' manipulation.

- **Colour** (NB: definition revised 2020):

Only colour images which do not fit into the 'Creative' or 'Monochrome' Classes should be entered into the Colour Class. 'Altered Reality' images are considered 'Creative' (please see the 'Creative' definition).

Images clearly fitting the 'Scapes' definition should normally be entered into the 'Scapes' Class, where they may be considered more favourably.

Nature images should normally be entered into the 'Nature' Class. If a nature image is entered in the 'Colour' Class, it will be assumed to fall outside the definition of the 'Nature' Class, such as because of 'artistic' manipulation.

- **Mobile Phone:**

To be eligible, a 'Mobile Phone' image must be taken on a device whose main purpose is to conduct telephone communications and which also has a factory fitted integrated camera.

Images taken on hybrid DSLRs or 'system' cameras with interchangeable lenses and which have an auxiliary telephone or which use wifi or a telephone attachment to take an image remotely (e.g. via an 'app' on a phone) are not eligible in this Class. However, images taken on a mobile phone fitted with a 'clip-on additional lens are eligible.

Images entered into the 'Mobile Phone' Class may be colour or monochrome and may be of any subject (including 'Nature', 'Scapes' and 'Creative').

While 'Mobile Phone' images must be taken on a mobile phone they may be processed either on a mobile phone or on a separate computer.

In addition to the general requirement to be able to supply the original image, Award winners must additionally be willing to declare to the Organisers, if requested, the make and model of the device used to take the original image.

If entrants wish they may, in lieu of entering in the 'Mobile Phone' Class, enter an image taken on a mobile phone in any of the other Classes above where the image meets the criteria for that Class's criteria. However, that image (or a similar image) cannot then also be entered into the Mobile Phone Class.

We rely on the honesty and integrity of the photographer not to submit images taken on anything other than a mobile phone.

Guidance Note:

*Entrants are advised they might be disadvantaged if they submit a Mobile Phone image substantially smaller than the 1600 by 1200 pixels image size. Please refer to the Image Preparation guidance.*

**Please ensure you understand the definitions and take care to submit your photographs into the appropriate Class. Images which are ineligible for the Class in which they have been entered, or which would be a significantly better fit in an alternative Class, may be marked down, or disqualified, at the Selectors' discretion.**

## Image Preparation Guidance

- The images will be projected using a colour-calibrated high-quality digital projector, or display, which has a displayable image area of 1600 pixels wide by 1200 pixels high.
- Images which are smaller than 1600 by 1200 pixels will be displayed as is (i.e. they will not be made any bigger) and will be surrounded by black as required to fill the displayable area when presented for selection.
- The online submission web site will not allow you to enter an image which exceeds either 1600 pixels wide or 1200 pixels high.
- Only JPEG images will be accepted.
- A sRGB colourspace will be assumed. It is strongly recommended that submitted images should have been converted to the sRGB colourspace, otherwise the Selectors may not see the same colours that you intend!
- Please note that each image file to be uploaded must be no larger than 3 Mb.
- Please also read the Section on File Naming.

## Image File and Image Title Naming Requirements

- Image files submitted using the online submission website may have any file name, within reason, with the proviso that the file must be a valid JPEG file with the file name suffix '.jpg'.
- Image Titles are restricted to 35 characters including spaces.
- Certain punctuation characters are not permitted within Image Titles. These are: \_ # & / : ; \* " ~ < > | ? \
- Please ensure you do not include your name in the Image Title – any images with the Author's name in the Title will be disqualified from the Selection.
- Please use 'Title Capitalisation' in the Image Titles.
- The website will attempt to convert your file name into a preliminary image title. You may then modify that title to suit your requirements both before uploading the image and, if necessary or desired, after the upload. Please note that if amended after the original submission, the entry **MUST THEN BE REFINALISED**, otherwise submission is not made.
- Image titles will be available to the Selectors upon request but may not be displayed as a matter of course.
- Although the Organisers may use reasonable endeavours to amend what they believe are obvious errors, if spotted, if your title has an error it may appear in the catalogue, any certificates and on the results web pages just as you have submitted it - **do please check your spelling!**
